基本经济问题 | The basic economic problem

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q1 [2 marks]

Define scarcity and its significance for choice in a hypothetical economy.

Q2 [4 marks]

Explain choice and its significance for opportunity cost in a hypothetical economy.

Q3 [4 marks]

A hypothetical economy reports a 12% change in opportunity cost and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q4 [6 marks]

Analyse factors of production and its significance for production possibility curve in a hypothetical economy.

Q5 [8 marks]

Discuss production possibility curve and its significance for economic growth in a hypothetical economy.

Q6 [8 marks]

Assess economic growth and its significance for scarcity in a hypothetical economy.

Q7 [8 marks]

Evaluate scarcity and its significance for choice in a hypothetical economy.

Q8 [6 marks]

Compare choice and its significance for opportunity cost in a hypothetical economy.

Q9 [4 marks]

Distinguish between opportunity cost and its significance for factors of production in a hypothetical economy.

Q10 [6 marks]

Using a diagram, explain how a change in factors of production may affect production possibility curve.

Q11 [8 marks]

Consider whether production possibility curve and its significance for economic growth in a hypothetical economy.

Q12 [12 marks]

To what extent economic growth and its significance for scarcity in a hypothetical economy.

资源配置 | The allocation of resources

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q13 [2 marks]

Define demand and its significance for supply in a hypothetical economy.

Q14 [4 marks]

Explain supply and its significance for equilibrium in a hypothetical economy.

Q15 [4 marks]

A hypothetical economy reports a 12% change in equilibrium and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q16 [6 marks]

Analyse price elasticity of demand and its significance for price elasticity of supply in a hypothetical economy.

Q17 [8 marks]

Discuss price elasticity of supply and its significance for market failure in a hypothetical economy.

Q18 [8 marks]

Assess market failure and its significance for demand in a hypothetical economy.

Q19 [8 marks]

Evaluate demand and its significance for supply in a hypothetical economy.

Q20 [6 marks]

Compare supply and its significance for equilibrium in a hypothetical economy.

Q21 [4 marks]

Distinguish between equilibrium and its significance for price elasticity of demand in a hypothetical economy.

Q22 [6 marks]

Using a diagram, explain how a change in price elasticity of demand may affect price elasticity of supply.

Q23 [8 marks]

Consider whether price elasticity of supply and its significance for market failure in a hypothetical economy.

Q24 [12 marks]

To what extent market failure and its significance for demand in a hypothetical economy.

微观经济决策者 | Microeconomic decision makers

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q25 [2 marks]

Define money and its significance for commercial bank in a hypothetical economy.

Q26 [4 marks]

Explain commercial bank and its significance for household in a hypothetical economy.

Q27 [4 marks]

A hypothetical economy reports a 12% change in household and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q28 [6 marks]

Analyse trade union and its significance for productivity in a hypothetical economy.

Q29 [8 marks]

Discuss productivity and its significance for economies of scale in a hypothetical economy.

Q30 [8 marks]

Assess economies of scale and its significance for money in a hypothetical economy.

Q31 [8 marks]

Evaluate money and its significance for commercial bank in a hypothetical economy.

Q32 [6 marks]

Compare commercial bank and its significance for household in a hypothetical economy.

Q33 [4 marks]

Distinguish between household and its significance for trade union in a hypothetical economy.

Q34 [6 marks]

Using a diagram, explain how a change in trade union may affect productivity.

Q35 [8 marks]

Consider whether productivity and its significance for economies of scale in a hypothetical economy.

Q36 [12 marks]

To what extent economies of scale and its significance for money in a hypothetical economy.

政府与宏观经济 | Government and the macroeconomy

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q37 [2 marks]

Define economic growth and its significance for unemployment in a hypothetical economy.

Q38 [4 marks]

Explain unemployment and its significance for inflation in a hypothetical economy.

Q39 [4 marks]

A hypothetical economy reports a 12% change in inflation and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q40 [6 marks]

Analyse fiscal policy and its significance for monetary policy in a hypothetical economy.

Q41 [8 marks]

Discuss monetary policy and its significance for balance of payments in a hypothetical economy.

Q42 [8 marks]

Assess balance of payments and its significance for economic growth in a hypothetical economy.

Q43 [8 marks]

Evaluate economic growth and its significance for unemployment in a hypothetical economy.

Q44 [6 marks]

Compare unemployment and its significance for inflation in a hypothetical economy.

Q45 [4 marks]

Distinguish between inflation and its significance for fiscal policy in a hypothetical economy.

Q46 [6 marks]

Using a diagram, explain how a change in fiscal policy may affect monetary policy.

Q47 [8 marks]

Consider whether monetary policy and its significance for balance of payments in a hypothetical economy.

Q48 [12 marks]

To what extent balance of payments and its significance for economic growth in a hypothetical economy.

经济发展 | Economic development

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q49 [2 marks]

Define living standards and its significance for GDP per head in a hypothetical economy.

Q50 [4 marks]

Explain GDP per head and its significance for Human Development Index in a hypothetical economy.

Q51 [4 marks]

A hypothetical economy reports a 12% change in Human Development Index and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q52 [6 marks]

Analyse poverty and its significance for population in a hypothetical economy.

Q53 [8 marks]

Discuss population and its significance for development in a hypothetical economy.

Q54 [8 marks]

Assess development and its significance for living standards in a hypothetical economy.

Q55 [8 marks]

Evaluate living standards and its significance for GDP per head in a hypothetical economy.

Q56 [6 marks]

Compare GDP per head and its significance for Human Development Index in a hypothetical economy.

Q57 [4 marks]

Distinguish between Human Development Index and its significance for poverty in a hypothetical economy.

Q58 [6 marks]

Using a diagram, explain how a change in poverty may affect population.

Q59 [8 marks]

Consider whether population and its significance for development in a hypothetical economy.

Q60 [12 marks]

To what extent development and its significance for living standards in a hypothetical economy.

国际贸易与全球化 | International trade and globalisation

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q61 [2 marks]

Define specialisation and its significance for comparative advantage in a hypothetical economy.

Q62 [4 marks]

Explain comparative advantage and its significance for free trade in a hypothetical economy.

Q63 [4 marks]

A hypothetical economy reports a 12% change in free trade and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q64 [6 marks]

Analyse protectionism and its significance for exchange rate in a hypothetical economy.

Q65 [8 marks]

Discuss exchange rate and its significance for current account in a hypothetical economy.

Q66 [8 marks]

Assess current account and its significance for specialisation in a hypothetical economy.

Q67 [8 marks]

Evaluate specialisation and its significance for comparative advantage in a hypothetical economy.

Q68 [6 marks]

Compare comparative advantage and its significance for free trade in a hypothetical economy.

Q69 [4 marks]

Distinguish between free trade and its significance for protectionism in a hypothetical economy.

Q70 [6 marks]

Using a diagram, explain how a change in protectionism may affect exchange rate.

Q71 [8 marks]

Consider whether exchange rate and its significance for current account in a hypothetical economy.

Q72 [12 marks]

To what extent current account and its significance for specialisation in a hypothetical economy.
