AS 基本经济思想与资源配置 | Basic economic ideas and resource allocation

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q73 [2 marks]

Define scarcity and its significance for opportunity cost in a hypothetical economy.

Q74 [4 marks]

Explain opportunity cost and its significance for positive statement in a hypothetical economy.

Q75 [4 marks]

A hypothetical economy reports a 12% change in positive statement and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q76 [6 marks]

Analyse normative statement and its significance for PPC in a hypothetical economy.

Q77 [8 marks]

Discuss PPC and its significance for public good in a hypothetical economy.

Q78 [8 marks]

Assess public good and its significance for scarcity in a hypothetical economy.

Q79 [8 marks]

Evaluate scarcity and its significance for opportunity cost in a hypothetical economy.

Q80 [6 marks]

Compare opportunity cost and its significance for positive statement in a hypothetical economy.

Q81 [4 marks]

Distinguish between positive statement and its significance for normative statement in a hypothetical economy.

Q82 [6 marks]

Using a diagram, explain how a change in normative statement may affect PPC.

Q83 [8 marks]

Consider whether PPC and its significance for public good in a hypothetical economy.

AS 价格体系与微观经济 | The price system and the microeconomy

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q84 [2 marks]

Define demand and its significance for supply in a hypothetical economy.

Q85 [4 marks]

Explain supply and its significance for PED in a hypothetical economy.

Q86 [4 marks]

A hypothetical economy reports a 12% change in PED and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q87 [6 marks]

Analyse YED and its significance for XED in a hypothetical economy.

Q88 [8 marks]

Discuss XED and its significance for consumer surplus in a hypothetical economy.

Q89 [8 marks]

Assess consumer surplus and its significance for demand in a hypothetical economy.

Q90 [8 marks]

Evaluate demand and its significance for supply in a hypothetical economy.

Q91 [6 marks]

Compare supply and its significance for PED in a hypothetical economy.

Q92 [4 marks]

Distinguish between PED and its significance for YED in a hypothetical economy.

Q93 [6 marks]

Using a diagram, explain how a change in YED may affect XED.

Q94 [8 marks]

Consider whether XED and its significance for consumer surplus in a hypothetical economy.

AS 政府微观干预 | Government microeconomic intervention

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q95 [2 marks]

Define externality and its significance for merit good in a hypothetical economy.

Q96 [4 marks]

Explain merit good and its significance for demerit good in a hypothetical economy.

Q97 [4 marks]

A hypothetical economy reports a 12% change in demerit good and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q98 [6 marks]

Analyse indirect tax and its significance for subsidy in a hypothetical economy.

Q99 [8 marks]

Discuss subsidy and its significance for price ceiling in a hypothetical economy.

Q100 [8 marks]

Assess price ceiling and its significance for externality in a hypothetical economy.

Q101 [8 marks]

Evaluate externality and its significance for merit good in a hypothetical economy.

Q102 [6 marks]

Compare merit good and its significance for demerit good in a hypothetical economy.

Q103 [4 marks]

Distinguish between demerit good and its significance for indirect tax in a hypothetical economy.

Q104 [6 marks]

Using a diagram, explain how a change in indirect tax may affect subsidy.

Q105 [8 marks]

Consider whether subsidy and its significance for price ceiling in a hypothetical economy.

AS 宏观经济 | The macroeconomy

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q106 [2 marks]

Define GDP and its significance for aggregate demand in a hypothetical economy.

Q107 [4 marks]

Explain aggregate demand and its significance for aggregate supply in a hypothetical economy.

Q108 [4 marks]

A hypothetical economy reports a 12% change in aggregate supply and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q109 [6 marks]

Analyse inflation and its significance for unemployment in a hypothetical economy.

Q110 [8 marks]

Discuss unemployment and its significance for current account in a hypothetical economy.

Q111 [8 marks]

Assess current account and its significance for GDP in a hypothetical economy.

Q112 [8 marks]

Evaluate GDP and its significance for aggregate demand in a hypothetical economy.

Q113 [6 marks]

Compare aggregate demand and its significance for aggregate supply in a hypothetical economy.

Q114 [4 marks]

Distinguish between aggregate supply and its significance for inflation in a hypothetical economy.

Q115 [6 marks]

Using a diagram, explain how a change in inflation may affect unemployment.

Q116 [8 marks]

Consider whether unemployment and its significance for current account in a hypothetical economy.

AS 政府宏观干预 | Government macroeconomic intervention

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q117 [2 marks]

Define fiscal policy and its significance for monetary policy in a hypothetical economy.

Q118 [4 marks]

Explain monetary policy and its significance for supply-side policy in a hypothetical economy.

Q119 [4 marks]

A hypothetical economy reports a 12% change in supply-side policy and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q120 [6 marks]

Analyse budget deficit and its significance for interest rate in a hypothetical economy.

Q121 [8 marks]

Discuss interest rate and its significance for policy conflict in a hypothetical economy.

Q122 [8 marks]

Assess policy conflict and its significance for fiscal policy in a hypothetical economy.

Q123 [8 marks]

Evaluate fiscal policy and its significance for monetary policy in a hypothetical economy.

Q124 [6 marks]

Compare monetary policy and its significance for supply-side policy in a hypothetical economy.

Q125 [4 marks]

Distinguish between supply-side policy and its significance for budget deficit in a hypothetical economy.

Q126 [6 marks]

Using a diagram, explain how a change in budget deficit may affect interest rate.

Q127 [8 marks]

Consider whether interest rate and its significance for policy conflict in a hypothetical economy.

AS 国际经济问题 | International economic issues

4. 单元练习 (全英文, 仿 Paper 2)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q128 [2 marks]

Define absolute advantage and its significance for comparative advantage in a hypothetical economy.

Q129 [4 marks]

Explain comparative advantage and its significance for tariff in a hypothetical economy.

Q130 [4 marks]

A hypothetical economy reports a 12% change in tariff and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q131 [6 marks]

Analyse quota and its significance for depreciation in a hypothetical economy.

Q132 [8 marks]

Discuss depreciation and its significance for Marshall–Lerner condition in a hypothetical economy.

Q133 [8 marks]

Assess Marshall–Lerner condition and its significance for absolute advantage in a hypothetical economy.

Q134 [8 marks]

Evaluate absolute advantage and its significance for comparative advantage in a hypothetical economy.

Q135 [6 marks]

Compare comparative advantage and its significance for tariff in a hypothetical economy.

Q136 [4 marks]

Distinguish between tariff and its significance for quota in a hypothetical economy.

Q137 [6 marks]

Using a diagram, explain how a change in quota may affect depreciation.

Q138 [8 marks]

Consider whether depreciation and its significance for Marshall–Lerner condition in a hypothetical economy.

A Level 价格体系与微观经济 II | The price system and the microeconomy A Level

4. 单元练习 (全英文, 仿 Paper 4)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q139 [2 marks]

Define marginal utility and its significance for indifference curve in a hypothetical economy.

Q140 [4 marks]

Explain indifference curve and its significance for marginal cost in a hypothetical economy.

Q141 [4 marks]

A hypothetical economy reports a 12% change in marginal cost and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q142 [6 marks]

Analyse perfect competition and its significance for oligopoly in a hypothetical economy.

Q143 [8 marks]

Discuss oligopoly and its significance for monopsony in a hypothetical economy.

Q144 [8 marks]

Assess monopsony and its significance for marginal utility in a hypothetical economy.

Q145 [8 marks]

Evaluate marginal utility and its significance for indifference curve in a hypothetical economy.

Q146 [6 marks]

Compare indifference curve and its significance for marginal cost in a hypothetical economy.

Q147 [4 marks]

Distinguish between marginal cost and its significance for perfect competition in a hypothetical economy.

Q148 [6 marks]

Using a diagram, explain how a change in perfect competition may affect oligopoly.

A Level 政府微观干预 II | Government microeconomic intervention A Level

4. 单元练习 (全英文, 仿 Paper 4)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q149 [2 marks]

Define allocative efficiency and its significance for productive efficiency in a hypothetical economy.

Q150 [4 marks]

Explain productive efficiency and its significance for dynamic efficiency in a hypothetical economy.

Q151 [4 marks]

A hypothetical economy reports a 12% change in dynamic efficiency and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q152 [6 marks]

Analyse Gini coefficient and its significance for redistribution in a hypothetical economy.

Q153 [8 marks]

Discuss redistribution and its significance for government failure in a hypothetical economy.

Q154 [8 marks]

Assess government failure and its significance for allocative efficiency in a hypothetical economy.

Q155 [8 marks]

Evaluate allocative efficiency and its significance for productive efficiency in a hypothetical economy.

Q156 [6 marks]

Compare productive efficiency and its significance for dynamic efficiency in a hypothetical economy.

Q157 [4 marks]

Distinguish between dynamic efficiency and its significance for Gini coefficient in a hypothetical economy.

Q158 [6 marks]

Using a diagram, explain how a change in Gini coefficient may affect redistribution.

A Level 宏观经济 II | The macroeconomy A Level

4. 单元练习 (全英文, 仿 Paper 4)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q159 [2 marks]

Define multiplier and its significance for accelerator in a hypothetical economy.

Q160 [4 marks]

Explain accelerator and its significance for output gap in a hypothetical economy.

Q161 [4 marks]

A hypothetical economy reports a 12% change in output gap and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q162 [6 marks]

Analyse money supply and its significance for Phillips curve in a hypothetical economy.

Q163 [8 marks]

Discuss Phillips curve and its significance for natural rate of unemployment in a hypothetical economy.

Q164 [8 marks]

Assess natural rate of unemployment and its significance for multiplier in a hypothetical economy.

Q165 [8 marks]

Evaluate multiplier and its significance for accelerator in a hypothetical economy.

Q166 [6 marks]

Compare accelerator and its significance for output gap in a hypothetical economy.

Q167 [4 marks]

Distinguish between output gap and its significance for money supply in a hypothetical economy.

Q168 [6 marks]

Using a diagram, explain how a change in money supply may affect Phillips curve.

A Level 政府宏观干预 II | Government macroeconomic intervention A Level

4. 单元练习 (全英文, 仿 Paper 4)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q169 [2 marks]

Define discretionary policy and its significance for automatic stabiliser in a hypothetical economy.

Q170 [4 marks]

Explain automatic stabiliser and its significance for quantitative easing in a hypothetical economy.

Q171 [4 marks]

A hypothetical economy reports a 12% change in quantitative easing and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q172 [6 marks]

Analyse crowding out and its significance for Laffer curve in a hypothetical economy.

Q173 [8 marks]

Discuss Laffer curve and its significance for policy mix in a hypothetical economy.

Q174 [8 marks]

Assess policy mix and its significance for discretionary policy in a hypothetical economy.

Q175 [8 marks]

Evaluate discretionary policy and its significance for automatic stabiliser in a hypothetical economy.

Q176 [6 marks]

Compare automatic stabiliser and its significance for quantitative easing in a hypothetical economy.

Q177 [4 marks]

Distinguish between quantitative easing and its significance for crowding out in a hypothetical economy.

Q178 [6 marks]

Using a diagram, explain how a change in crowding out may affect Laffer curve.

A Level 国际经济问题 II | International economic issues

A Level

4. 单元练习 (全英文, 仿 Paper 4)

All scenarios and questions below are original. Write in continuous prose unless a calculation or diagram is requested.

Q179 [2 marks]

Define terms of trade and its significance for trade creation in a hypothetical economy.

Q180 [4 marks]

Explain trade creation and its significance for trade diversion in a hypothetical economy.

Q181 [4 marks]

A hypothetical economy reports a 12% change in trade diversion and a 6% change in a related variable. Calculate the relevant ratio and explain what the value may indicate.

Q182 [6 marks]

Analyse foreign direct investment and its significance for economic development in a hypothetical economy.

Q183 [8 marks]

Discuss economic development and its significance for foreign aid in a hypothetical economy.

Q184 [8 marks]

Assess foreign aid and its significance for terms of trade in a hypothetical economy.

Q185 [8 marks]

Evaluate terms of trade and its significance for trade creation in a hypothetical economy.

Q186 [6 marks]

Compare trade creation and its significance for trade diversion in a hypothetical economy.

Q187 [4 marks]

Distinguish between trade diversion and its significance for foreign direct investment in a hypothetical economy.

Q188 [6 marks]

Using a diagram, explain how a change in foreign direct investment may affect economic development.
